Donating to PAVIR

For gifts or donations that investigators wish to be used in support of their research, there must be a letter from the donor indicating that the funding is a gift to be used by the designated beneficiary in support of [specify as needed] research or education activities. Further, the letter should indicate that the gift is irrevocable and imposes no contractual requirement of PAVIR. Alternatively, if the gift or donation is unrestricted to a very specific use, there must be a letter stating this. Letters accompanying donations from companies must be on company letterhead. A Sample Donor Letter may be downloaded and edited as needed. Find additional information on "Giving".
