Common Equipment

Many research projects depend on access to highly specialized laboratory equipment.Following is a list of some of the PAVIR supported equipment. The list is intended to facilitate easy access for all participants of our VA Palo Alto based research community.

- ABI PRISM 7900HT Sequence Detection System
- Agilent Bioanalyzer 2100
- Agilent Ion-Trap Mass Spectrometer
- AutoMACS Pro Separator by Miltenyi
- Benchtop Flow Cytometers
- Cell Sorters
- Eppendorf epMotion Liquid Handling System
- Fluidigm BioMark Multiplex Quantitative PCR System
- LEICA CM3050S Microtome Cryostat
- Luminex 200- Bead Array System
- Mesoscale Discovery SECTOR Imager 2400
- Zeiss 510 Scanning Laser Confocal Microscope
- Zeiss 710 Scanning Laser Confocal Microscope
- Zeiss Axio Imager D1
